-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/10/06 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 10-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Noiles (USPN 4,676,798).

With reference to Figures 5 and 6, Noiles discloses a prosthesis comprising a substantially rigid shell 64 for attachment to skeletal structure, the shell including a shell wall defining a shell receiving area and a termini shell margin 70 defining a shell opening to the shell receiving area, and a catch ledge (68); a resiliently yieldable UHMWPE liner comprising elements 12 and 17 for insertion in the shell receiving area, the liner including a liner wall having a liner inner surface defining a liner receiving area

Art Unit: 3738

the liner wall having a terminal liner margin 22 defining a restricted liner opening to the receiving area 19; and a substantially rigid retainer ring 74 attachable to the shell by means of catch legs and lips (34) to engage the terminal liner margin and inhibit deformation of the terminal liner margin. The liner extends to envelop a circumferential side apex of a femur ball 10. The inner surface is substantially spherical and the liner extends to envelop greater than a hemisphere of a femur ball. The restricted liner opening has a liner-opening diameter smaller than a largest diameter of the liner receiving area (see Fig. 3). The liner comprises a plurality of expansion slits 23 positioned adjacent the terminal liner margin and extending into the liner whereby the restricted liner opening is enlargeable and can be further restricted. The liner includes a snapping attachment mechanism 24 attaching the retainer ring to the shell, and the snapping attachment mechanism including a catch leg having a catch lip along 78 and the shell includes a catch ledge for engaging and holding the catch lip shown best in figure 6. The catch leg includes a plurality of contraction slots 98 dividing the legs.

Response to Arguments

Applicant's arguments with respect to claims 1-7 and 10-20 have been considered but are moot in view of the new ground(s) of rejection.
